These 5 windows represent apartment 1D, where the shooting occurred, under mostly clear skies (see exhibit 8 hereto attached). The window to the left of the small tree is the kitchen window as reflected in exhibit 2, photo 9 and exhibit 13 hereto attached herein. It should be noted these photos were taken in November of 1997, under cloudy skies, but yet there is an abundance of natural light outside. Also, it should be noted, the windows of the buildings have been redone since the time of the shooting.
